

The Total Economic Impact™ Of Cohesity On Cisco UCS

Through four customer interviews and data aggregation, Forrester concluded that Cohesity on Cisco UCS has the following three-year financial impact for backup and data management.

BEFORE

7 hours

Average recovery time (files, VMs, and servers)

AFTER

5 minutes

Recovery time with Cohesity on Cisco UCS

When I first saw how quickly Cohesity on Cisco UCS restored data, I thought it was smoke and mirrors. But we really have experienced that speed of restore. Even with an entire VM [virtual machine] being restored, we're back up and running in 5 minutes.

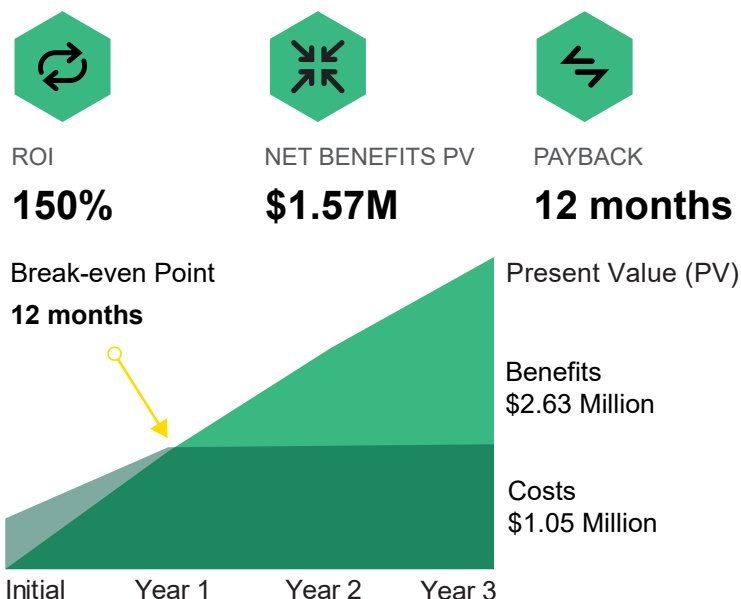

Manager of technology systems, healthcare

COHESITY ON CISCO UCS BY THE NUMBERS

- 83%-99% reduction in recovery time from backup
- 25% of workday returned to data administrators and application developers
- 70% reduction in annual storage infrastructure expenditures
- 80%+ less time to install servers with Cisco Validated Design

FINANCIAL SUMMARY

This document is an abridged version of a case study commissioned by Cisco titled: The Total Economic Impact™ Of Cohesity On Cisco UCS, November 2020.
