

Cisco Certified DevNet Expert Certification

Advance your career with NetDevOps expertise

As a NetDevOps professional, you know the competition is growing in the industry. Maybe you've been in your developer role for a while and are ready to advance your career. Perhaps you want to mentor or lead a team of NetDevOps engineers. Or maybe you're a network architect seeking more uses for automation in designing the network. No matter what your goals are, the Cisco Certified DevNet Expert certification can help you advance.

The certification validates the expert-level skills required for the planning, design, development, and maintenance of complex automation-driven network environments.

As a Cisco Certified DevNet Expert, you'll be uniquely qualified as a leader—applying evolving software technologies and deep-domain expertise. This expertise will help you meet business requirements dependent on an agile automation-driven IT infrastructure.

With these newfound skills, you and your team can scale and secure a company's infrastructure faster and more efficiently.

Benefits

- Proves expertise in planning, designing, developing, and maintaining, complex automation-driven network environments
- Opens the door to senior-level positions in the NetDevOps landscape
- Further advances skills and strategies, which can generate leadership roles, better pay, and more respect within the industry

Certification requirements

To earn the Cisco Certified DevNet Expert certification, you need to pass the Cisco® DEVCOR 350-901 exam, Developing Applications using Cisco Core Platforms and APIs (DEVCOR), as well as the Cisco Certified DevNet Expert (v1.0) Lab Exam, an 8-hour, hands-on exam that requires you to plan, design, develop, test, deploy, and maintain automation solutions with complex software-driven network environments.

Complete the core

While the Cisco Certified DevNet Expert lab exam isn't available until May 2, 2022, you can get started now on completing this certification by taking the DevNet core course and passing the DevNet qualifying exam.

If you have already earned your DevNet Professional certification, you'll only need to pass the 8-hour lab exam. If not, you can start preparing to pass the qualifying exam by taking the DevNet core course, Developing Applications using Cisco Core Platforms and APIs (DEVCOR) v1.0.

Cisco Certified DevNet Expert certification is career-changing

The time has never been better to upskill in the NetDevOps realm. More US jobs in NetDevOps are opening and are projected to increase over the next few years. And annual salaries in NetDevOps are climbing (\$123,000 - \$155,000).*

So start prepping now to change your career. The Cisco Certified DevNet Expert certification will get you one step closer to industry recognition that translates into jobs and possibilities.
