

# Why a circular economy matters and how it impacts your business

Shaun McCarthy  
Cisco  
VP Sales, Mass Scale Infrastructure Group

Tilly Gilbert  
STL Partners  
Principal Consultant & Edge Practice Lead

Esther Roure Vila  
Cisco  
Customer Success Specialist

## Welcome

Host: Shaun McCarthy, VP Sales, Mass Scale Infrastructure Group

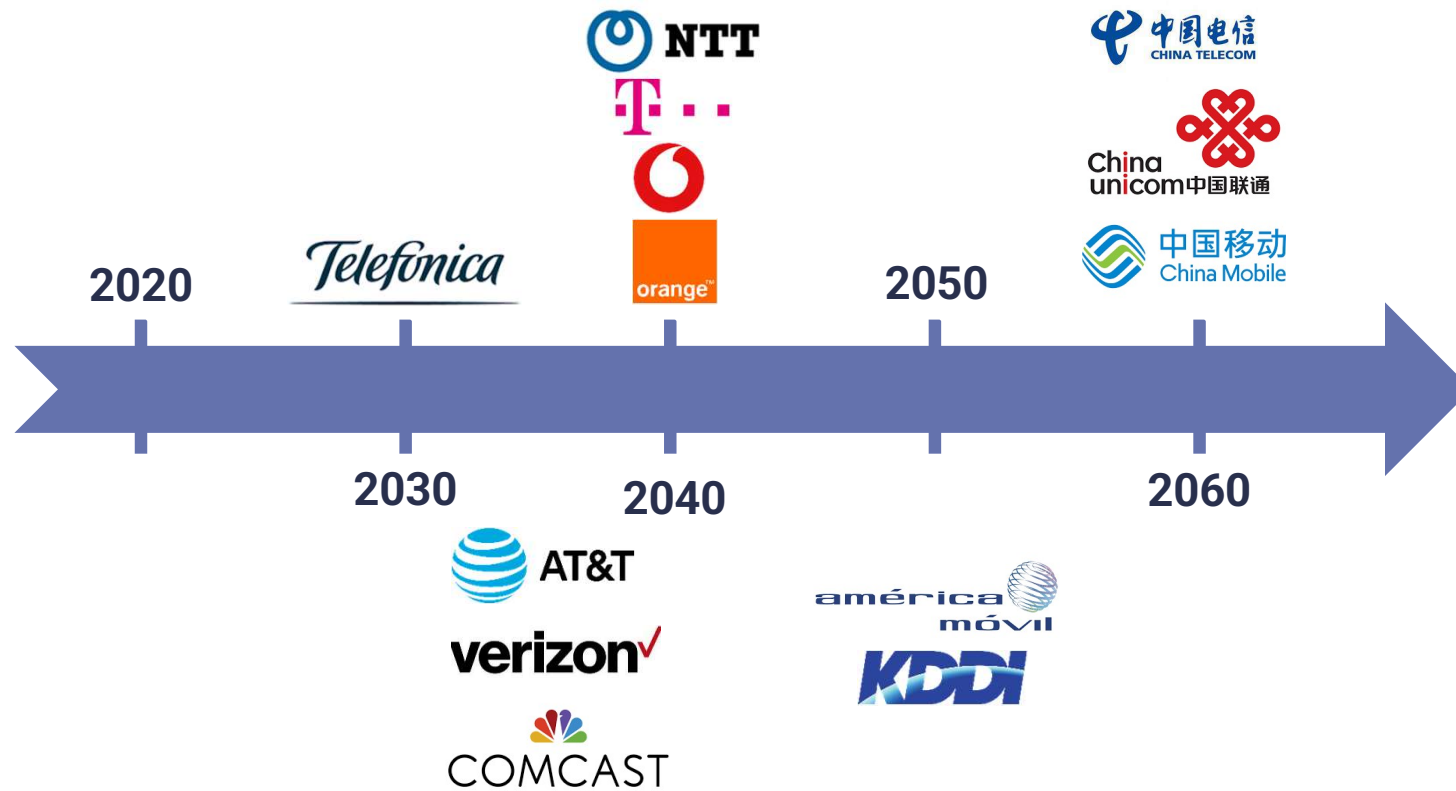

Earth Day: April 22, 2022

# Net zero carbon emissions: why, when and how?

Tilly Gilbert, STL Partners Principal Consultant

**STL** PARTNERS

# Most major service providers have already committed to a net zero goal – and now need to deliver on it

# Reducing carbon emissions makes good business sense for service providers

## Ensuring stakeholder and customer satisfaction

**UN CLIMATE  
CHANGE  
CONFERENCE  
UK 2021**

IN PARTNERSHIP WITH ITALY

**Governments**

**Enterprises**

**Stakeholders**

## Delivering clear business benefits

**Reducing CAPEX and OPEX**

**Growing revenues**

# We are already seeing strong progress made by leading service providers

Leading service providers are already well underway

Broadly service providers are progressing in the following ways

**Initial focus:** improving energy efficiency and automation (scope 1 & 2)

Then, there is an effort on sourcing greener energy (scope 2)

Then effort is **extended** to developing sustainable supply chain (scope 3)

# Successful service providers will be focused on carbon emission reduction on a number of fronts

## Networks

- Accelerating replacement of copper with fibre
- Managing the impact of increased data traffic with the roll out of 5G
- Shifting the way that network performance KPIs are evaluated

## IT

- Evaluating green cloud practices
- Committing to compliance with ISO standards
- Embracing the circular economy and the new business models that may come with this

## Data centres

- Designing sustainable data centres
- Moving non-latency sensitive workloads to regions with green electricity

## Offices and employees

- Reducing energy usage and waste through efficiency programmes
- Minimising unnecessary employee travel

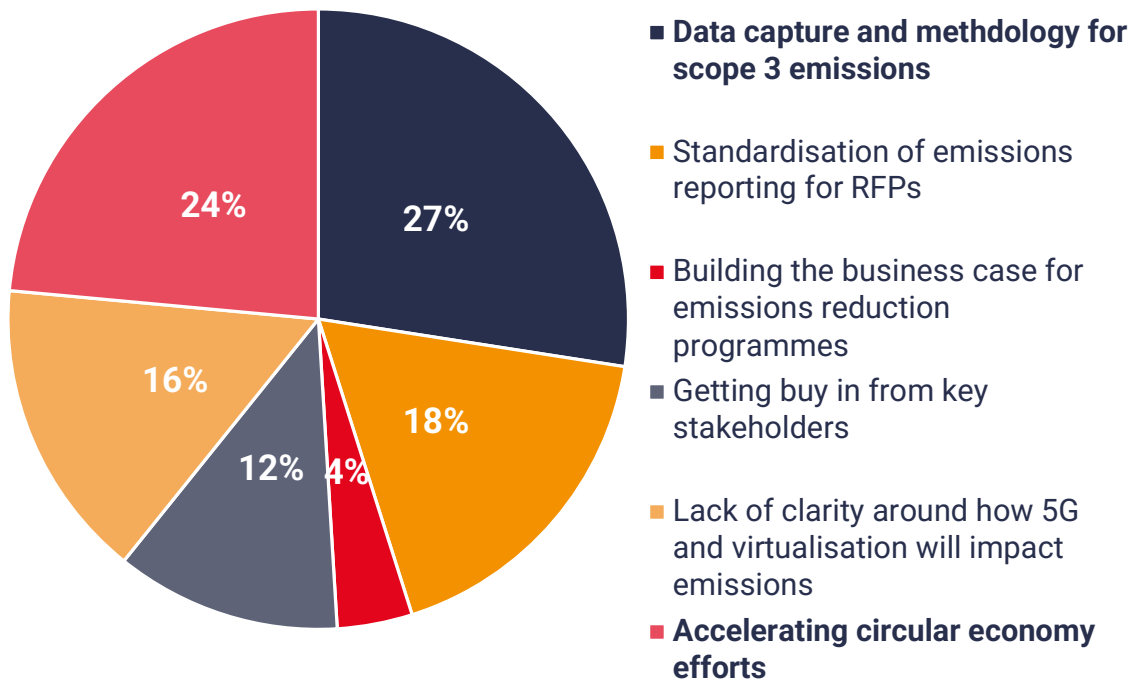

## Procurement

- Upgrading the importance of CSR capabilities in procurement selection criteria
- Working with suppliers to reduce carbon impact

# Scope 3 emissions must be front and centre of emissions reduction efforts

What are the biggest challenges around reducing carbon emissions for telcos?

## There are a number of areas where service providers should focus

- ✓ Use product rather than supplier level reporting when evaluating partners
- ✓ Automate reporting on sustainability KPIs for enterprise customers
- ✓ Focus on the circular economy
- ✓ Play an active role in industry collaboration

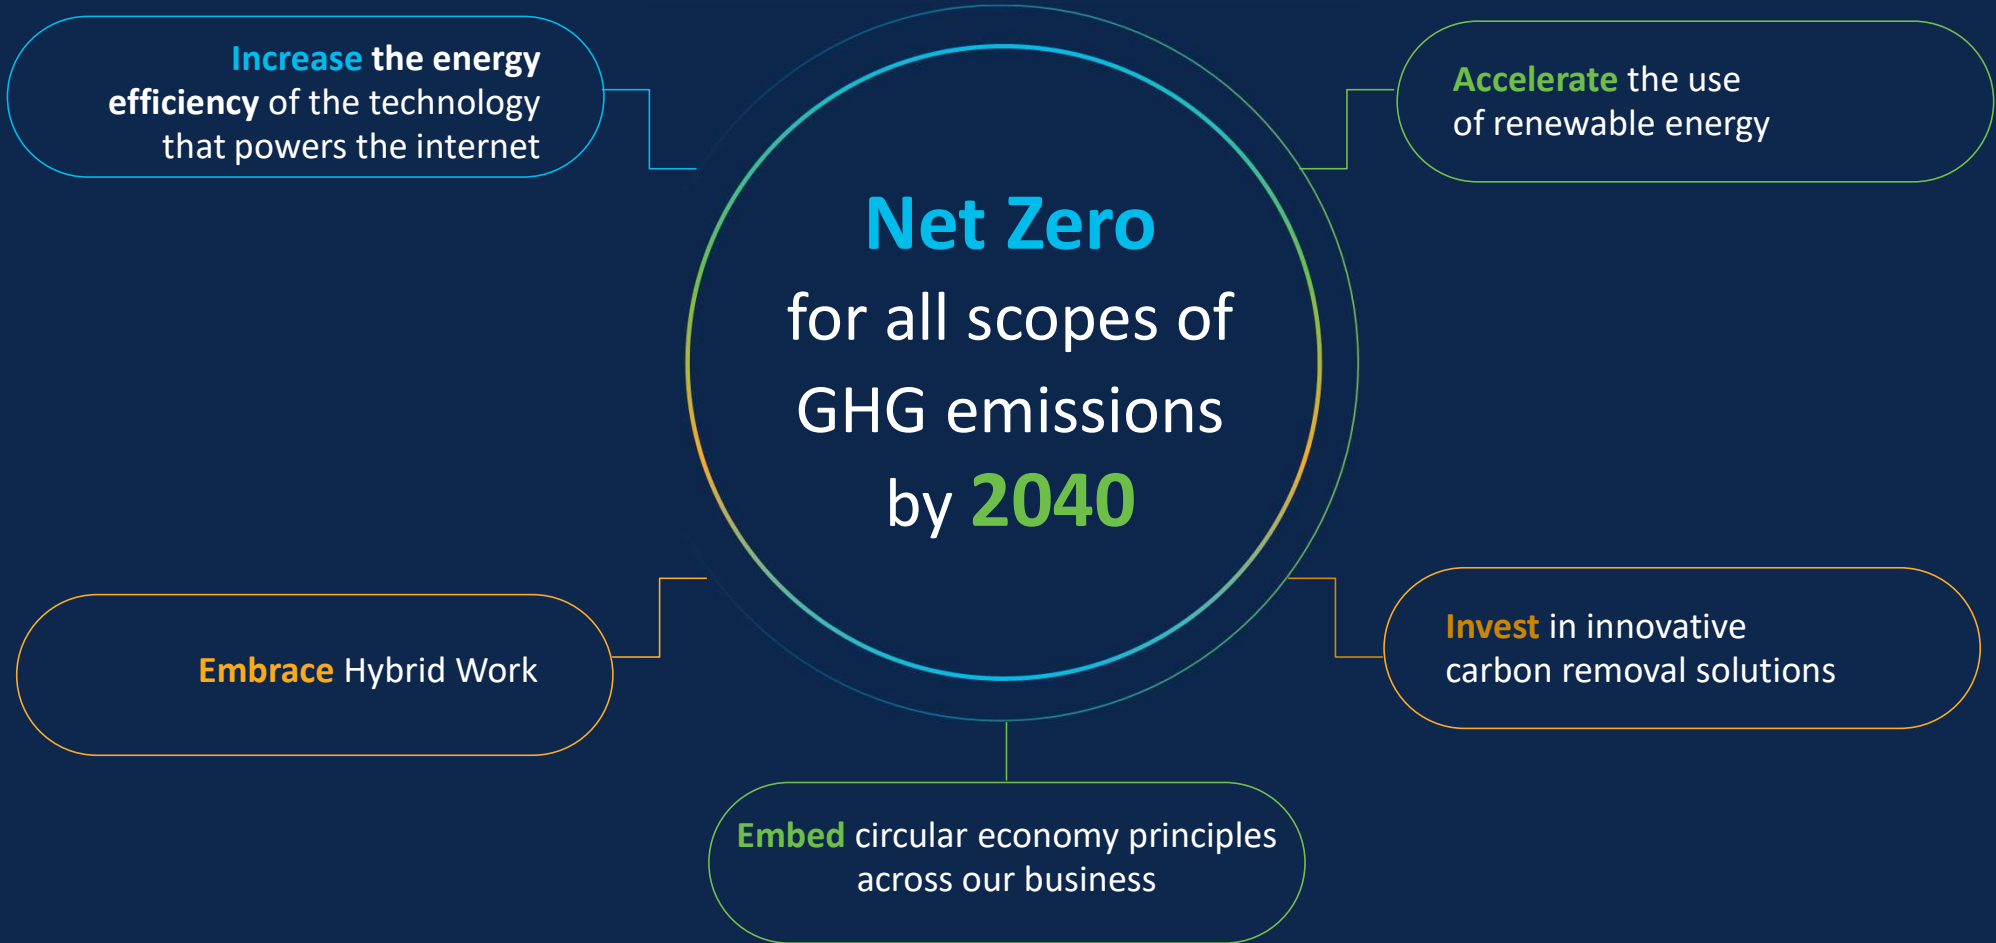

# An inclusive future depends on a healthy planet

- Esther Roure Vila
- Customer Success Specialist @Cisco

Net Zero by  
2040

Circularity  
embedded in  
business

100% renewable energy in US, Canada and parts of Europe.

Reuse or recycle 99.9% of returned products

## Leading by example

Modular design

# How can Cisco help:

Successful service providers will be focused on carbon emission reduction on a number of fronts

## Networks

IP/Optical Layer Convergence Architecture (Routed Optical Network) [>40% Energy Reduction through convergence](#)

Silicon One Semiconductor technology exponentially [increase energy efficiency and throughput](#)

Ensure that CSPs have good quality [data](#) about the products/services they purchase. Full Stack Observability and CX Cloud.

## IT

Reduce carbon footprint with [innovative architectures](#)

Embedding circularity in the [design](#) process

## Data centres

UCS-X servers are engineered to be quickly assembled and disassembled. The latest generation uses recycled plastic parts, recycled foam packaging, no wet paint, and has a 62% reduction in powder coat compared to the prior generation.

## Offices and employees

Hybrid Work  
Smart Buildings

## Procurement

Capture value from end-of-life equipment: [Recycle, reuse](#)  
[Supply Chain](#)

# Using technology as an enabler

- Green and Blue Innovation
- [Smart water solutions](#): [Case Study](#): Albuquerque Bernalillo County Water Utility Authority
- Total Economic Impact™ Of [Meraki MT Sensors](#) Forrester study
- Business continuity and travel reduction [Case Study: Del Brenta](#)
- One independent study<sup>(1)</sup> showed that total emissions from the few hours of a single long-haul flight are equal to the whole lifecycle of the Desk Pro – its production and five years of cloud collaboration for your business.
- Reducing Germany's carbon footprint one [Cisco IoT router at a time](#)
