Cisco Private 5G

A private 5G service that simplifies both 5G and IoT operations for enterprise digital transformation.

Cisco Knowledge Network

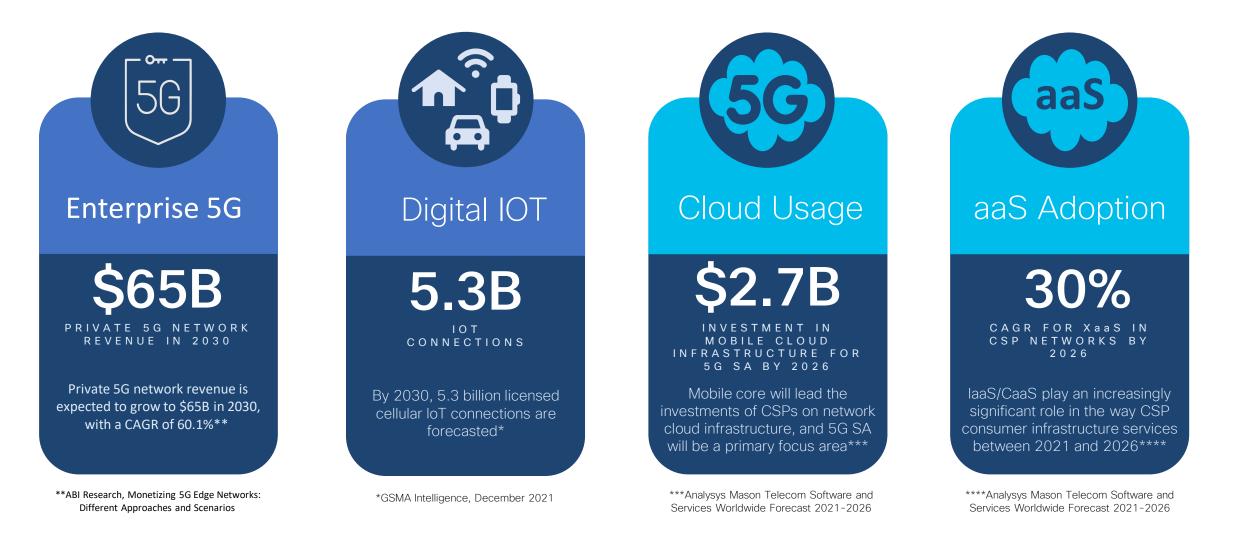

Private 5G – Delivered as a Service Simple – Intuitive – Trusted

May 12, 2022 Presenters: Arjun Ghatak, Ben Bleichman

Trending Private 5G priorities for executives

Private 5G expected to become the network standard of choice	Budgets are opening up, fuelled by COVID	Key drivers are leading to near-term opportunities		
Executives expecting that private 5G will become the standard network choice	COVID-19 has made it easier to secure the budget needed for 5G deployment.	Companies planning to deploy within the next six to 24 months to improve security, reliability and speed,

Cisco Private 5G Differentiators

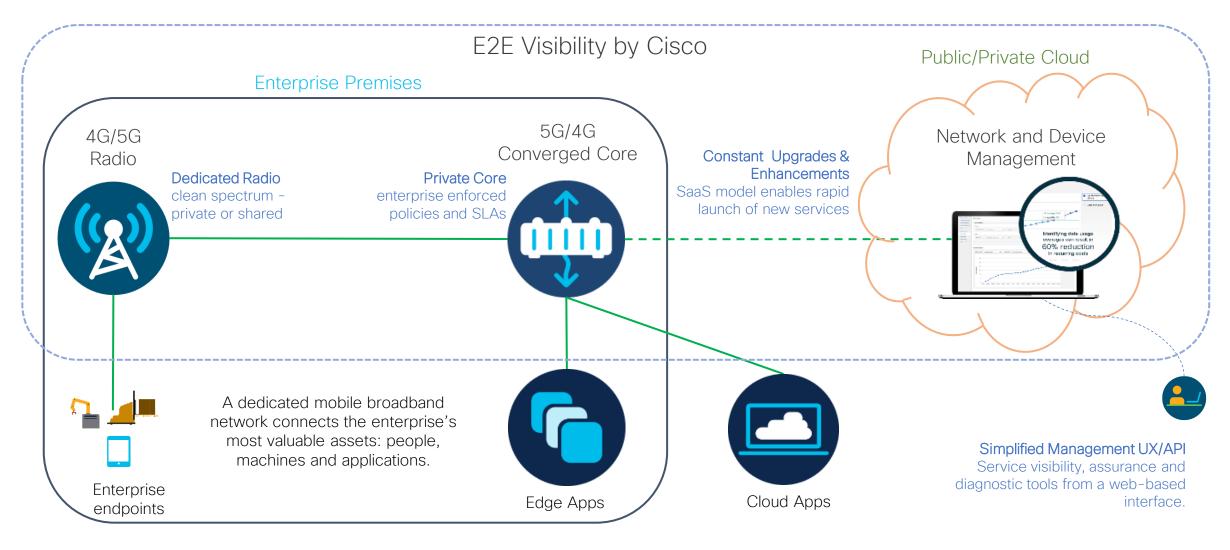

Private 5G Solution Overview

Cisco Private 5G – Partner–led Full stack subscription is pre-integrated and validated by Cisco

Private 5G Architecture

Private 5G Demonstration

Demo Scenario

General Equipment Manufacturing (GEM)

Demo Segments

1 Bring up the 5G Core

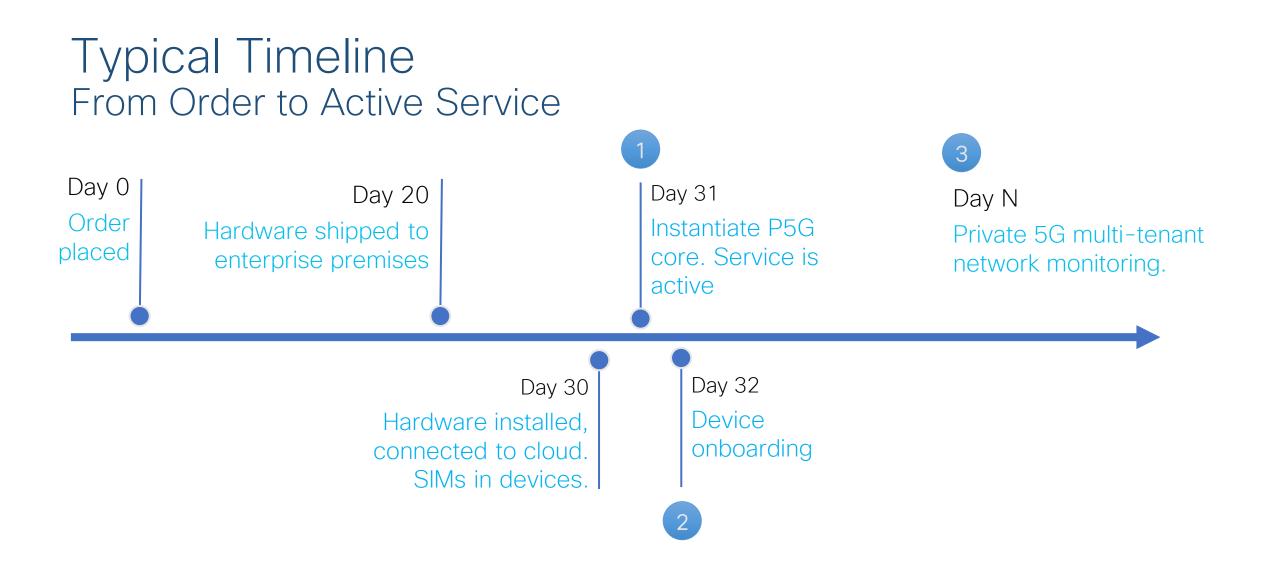

Name: Lars Role: Network Installer Earthcom Wireless

Onboard the Devices

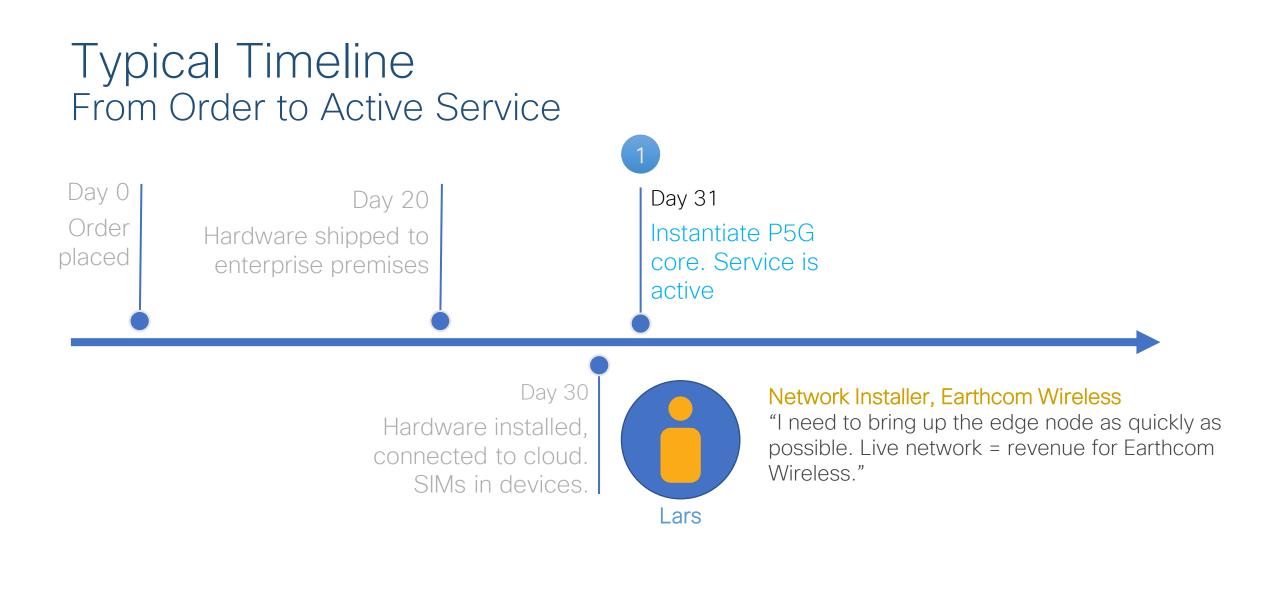

Name: Carla Role: Network Administrator General Equipment Manufacturing.

Name: Edward Role: Customer Success Manager Earthcom Wireless

Typical Timeline From Order to Active Service

Network Administrator, General Equipment Manufacturing.

"I need 5G device activation and management to be 'Wi-Fi simple.'"

SIM cards have already been ordered, auto provisioned, delivered and inserted into devices.

Day 32 Device onboarding

Typical Timeline From Order to Active Service

3

Day N Private 5G multi-tenant network monitoring.

Customer Success Manager, Enterprise Business Group, Earthcom Wireless "I need a holistic view of my all my customers' services with the ability to see specific KPIs."

Private 5G Service Evolution

Service Description

Optimized Edge	Scale & Performance	Automation & Monitoring
 2 servers-based high available edge to run converged core Next-gen ORAN deployment running RU/CU/DU 	 4G & 5G device support 5K sessions (4G + 5G combined) 15 Gbps throughput (4G + 5G combined) 	 Automated software deployment and configuration from cloud after initial edge installation E2E monitoring of the service Continuous enhancements
UX & API	Operations & Support	Enterprise Integration
 Web-based onboarding and service management dashboard Multi-tenant views E2E network status in simplified traffic light view [R, Y, G] APIs for external consumption 	 24x7x365 support Seamless software and firmware upgrade for edge appliance SIM cards supply, provisioning and configuration Partner and customer knowledge 	 Unified identity & policy through ISE integration in private 5G (Secondary authorization) Umbrella DNS security integration Leverage existing Catalyst portfolio

Service Evolution

Easy to

Deploy & Operate

Edge automation

Enterprise onboarding

(incl. multi-tenant view)

Dashboard for N/W visibility

٠

•

•

Secure & Scalable

- Unified policy and identity (ISE)
- Security integration with Umbrella DNS & SIG
- High availability
- APIs for monitoring & config
- Private network access security

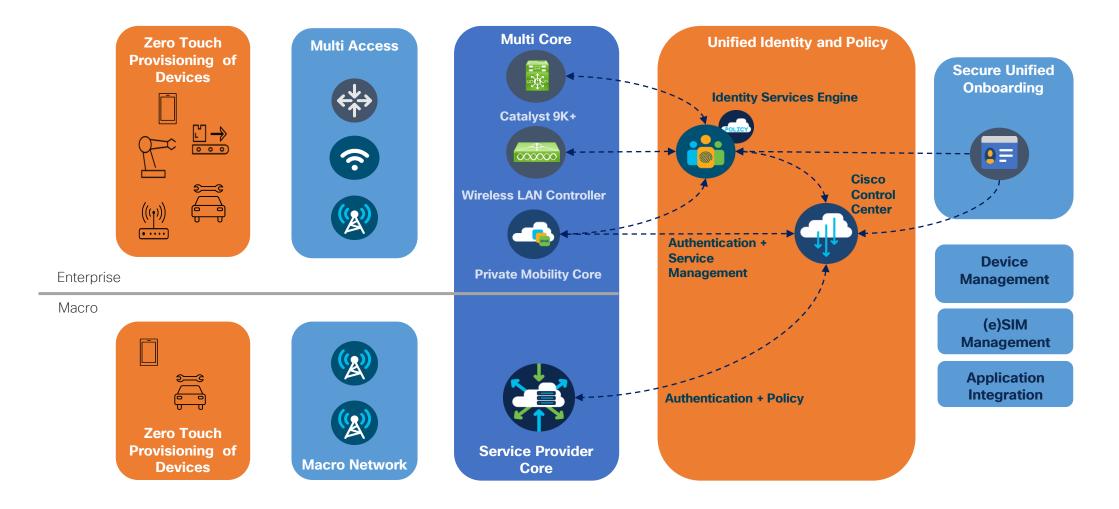

Private 5G 2.0

- Single-pane-of-management
 - DNA-C, Meraki, CC integration
- Wi-Fi offload
- Public/Private Roaming
- Unified telemetry platform
- FEDRAMP compliance

Industry leading Private 5G Solution with Enterprise Simplicity

Tighter Integration into Enterprise Services
